PROFESSIONAL SUMMARY

Data Scientist with 4 years of experience building ML models for recommendation systems and predictive analytics. Strong in Python, deep learning, and production ML deployment. Published researcher in NLP.

SKILLS

Python | NumPy | Pandas | Scikit-learn | TensorFlow | PyTorch | SQL | Spark | NLP | LLM Fine-tuning | Feature Engineering | MLflow | Docker | AWS SageMaker | A/B Testing | Statistics | Data Visualization (Matplotlib, Seaborn)

WORK EXPERIENCE

Senior Data Scientist - RecoAI Labs

May 2022 - Present (2 years)

- Built real-time recommendation engine using collaborative filtering and deep learning, improving CTR by 25%.
- Deployed ML models to production using MLflow and SageMaker, serving 5M+ predictions/day.
- Led NLP project for sentiment analysis of customer reviews using fine-tuned BERT models.
- Conducted A/B tests for model variants, establishing experimentation framework for the team.

Data Scientist - Flipkart

Jul 2020 - Apr 2022 (2 years)

- Developed demand forecasting models using gradient boosting, reducing inventory costs by 18%.
- Built feature engineering pipelines processing 100M+ rows using Spark.
- Collaborated with product team to define ML-driven personalization features.

EDUCATION

M.S. in Data Science

ISI Kolkata (2020)

B.Tech in Computer Science

IIIT Hyderabad (2018)

ACHIEVEMENTS

- Published 2 papers on NLP at ACL and EMNLP conferences
- Kaggle Competition Master (top 1%)
